- Problem-solving through iterative design
- Introductory programming and computational thinking

The curriculum emphasized creativity, collaboration, analytical thinking, and foundational engineering literacy aligned with international STEM education standards.

FIRST and FRC Informational Outreach

As part of the program, Team MOSTRA conducted dedicated informational sessions introducing:

- FIRST® (For Inspiration and Recognition of Science and Technology)
- FIRST Core Values (Gracious Professionalism®, Coopertition®)
- The structure and global impact of FIRST programs
- The FIRST Robotics Competition (FRC)
- Participation pathways and team establishment guidance
- Students were informed about robotics competitions, team-based engineering culture, and the academic and professional opportunities associated with FIRST participation.

Institutional Approval

This program was officially approved and hosted by the administration of Üsküdar Ata Ortaokulu and implemented in coordination with the school's academic structure.

This certificate is issued upon request for official documentation purposes and may be submitted as formal verification to external institutions, including but not limited to FIRST.

School Name: Üsküdar Ata Ortaokulu
